UGA Tifton Campus Class C Operator Training Record

Company: University of Georgia Tifton Campus

Class C Operator: __________________________________________________________

Location #1: 127 Bermuda Way, Tifton, GA 31793

I certify that I have been trained on the following to include information for both locations listed above:

A. Location of Emergency Shutoff Switches

B. Location of Emergency Equipment (Fire Extinguishers, First Aid Kits, Spill Cleanup kits, Barricades/Pylons, Other)

C. Who to call in an emergency

   Name: Tiffany Wiggins/ Robert Marchant/ FMO

   Contact #: (229)-386-7255 / (229)-445-0650/ (229)-386-3337

D. Location of breaker panels (Contact FMO for locations so you are able to direct Fire Dept. Personnel).

E. Other Potential hazards that need to be identified:

   Storm Drains

   Surface Water Bodies

   Nearby schools/businesses, etc.

Signature: __________________________________________________________

Date Trained: _______________________________________________________

Contact # and e-mail: _______________________________________________
Emergency Response Checklist:

1. Hit the “Emergency Stop Button”
2. Call 911
3. Evacuate customers and non-essential personnel and keep pedestrian and vehicular traffic out of any danger area as much as possible.
4. Call your supervisor and/or the Class A/B operator:

* Tiffany Wiggins: (229)-386-7255 or *Robert Marchant: (229)-445-0650
* FMO: (229)-386-3337

5. Contain and mitigate any release, if it can be done safely so that it doesn’t go down a storm drain or into the grass, or off site.

* Spill kits are available at the fuel pumps

Fire Extinguisher Directions:

* Remember: PASS

1. Pull the pin at the top of the fire extinguisher. The pin releases a locking mechanism and will allow you to discharge the extinguisher.
2. Aim at the base of the fire, not the flames. This is important in order to put out the fire, you must extinguish fuel.
3. Squeeze the lever slowly. This will release the extinguishing agent in the extinguisher. If the handle is released, the discharge will stop.
4. Sweep from side to side. Using a sweeping motion, move the fire ext. back and form until the fire is completely out. Operate the extinguisher from a safe distance, several feet away, and then move towards the fire once it starts to diminish.
UGA Tifton Campus Class C Operator Training Requirements

1. When dispensing gasoline into a container:

- Use only an approved portable container and place it on the ground to avoid a possible static electricity ignition of fuel vapors.
- Containers should never be filled while inside a vehicle or its trunk, the bed of a pickup truck or the floor of a trailer.
- When filling a portable container, manually control the nozzle valve throughout the filling process.
- Fill a portable container slowly to decrease the chance of static electricity buildup and to minimize the spilling or splattering.
- Keep the nozzle in contact with the rim of the container opening while refueling.
- Fill container no more than 95 percent full to allow for expansion.
- Place cap tightly on the container after filling-do no use containers that do not seal properly.

2. Safety Guidelines for fuel handling

- Do not over-fill or top-off your vehicle tank, which can cause gasoline spillage.
- Never allow children under the licensed driving age to operate the pump.
- Avoid prolonged breathing of gasoline vapors.
- Use gasoline only in open areas that get plenty of fresh air.
- Keep your face away from the nozzle or container opening.
- Never siphon gasoline by mouth not put gasoline in your mouth for any reason.
- Gasoline can be harmful or fatal if swallowed.
Safety Guidelines for fuel handling Continued...

- If someone swallows gasoline, do not induce vomiting.
- Contact a doctor or emergency medical service provider immediately.
- Keep gasoline away from your eyes and skin; it may cause irritation.
- Remove gasoline-soaked clothing immediately.
- Use gasoline only as a motor fuel.
- Never use gasoline to wash your hands or as a cleaning solvent.

3. Emergency and First Aid Procedures:

- If you come into contact with gasoline or diesel fuel, it is important that you follow these procedures:
  - EYES: Flush with water for 15 minutes.
  - SKIN: Remove any gasoline soaked clothing and wash exposed areas with soap and water.
  - INGESTION (swallowing): Call physician. DO NOT induce vomiting.
  - INHALATION:

The symptoms of inhalation of gasoline are:

- Dizziness, irritation of eyes, nose and throat, vomiting, bluish color of the skin, and central nervous system effects including contracted pupils, loss of reflexes, convulsions, seizures, sudden loss of consciousness, coma and sudden death. Other symptoms are headaches, flushing of the face, nausea, mental confusion and depression, loss of appetite, blurred speech and difficulty swallowing.

The symptoms of inhalation of diesel are:

- Drowsiness or narcosis from inhalation of high vapor concentrations.

*If there is inhalation of gasoline or diesel fuel vapors and the above symptoms occur, move to fresh air. If breathing has stopped, apply artificial respiration.
